July 2012

With the Olympics in full swing, housing has already medaled in several arenas. A few short years ago, housing was considered a headwind to economic recovery. Today, housing is seen as a tailwind to a stalling economy. For the first time since 2005, housing is on track for contributing positively to national GDP in 2012. That can occur either by way of direct residential investment or through remodeling and other ancillary services. Watch for signs of sustained tailwinds in a variety of indicators, including market times, seller concessions, prices and absorption rates.

New Listings in the Charlotte region increased 6.8 percent to 3,930. Pending Sales were down 15.3 percent to 1,738. Inventory levels shrank 16.9 percent to 19,001 units.

Prices moved higher. The Median Sales Price increased 1.6 percent to \$166,100. List to Close was down 8.5 percent to 144 days. The supply-demand balance stabilized as Months Supply of Inventory was down 29.7 percent to 8.8 months.

Sustained recovery will not occur without real employment and wage growth. Consumers must be confident in both the economy and their family finances before signing on the dotted line. Cheap borrowing costs have served as the glue binding things together. Unimaginable a few years ago, the rate on a 30-year fixed mortgage recently ducked below the 3.49 percent marker. Job creation and GDP numbers will garner particular attention this quarter.

July	89.7%	92.5%	+3.1%
12-Month Avg	89.0%	91.1%	+2.4%

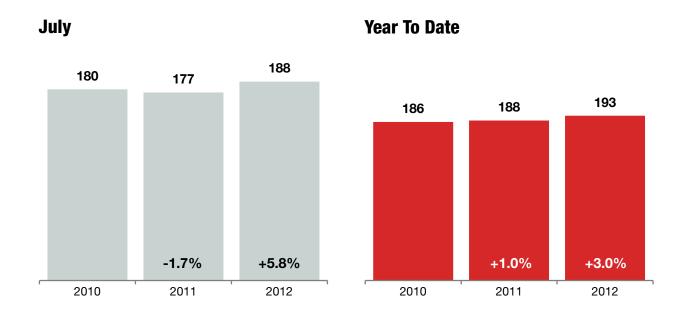

Historical Percent of Original List Price Received

Housing Affordability Index

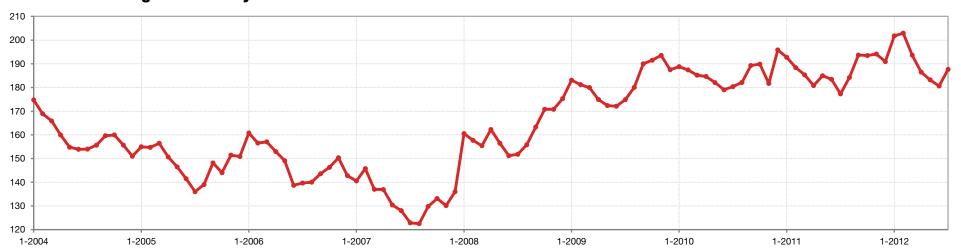

This index measures housing affordability for the region. An index of 120 means the median household income was 120% of what is necessary to qualify for the median-priced home under prevailing interest rates. A higher number means greater affordability.

Month	Prior Year	Current Year	+/-
August	182	184	+1.2%
September	189	194	+2.3%
October	190	193	+1.9%
