

Monthly Indicators

August 2016

Closed sales began to cool for much of the country last month, and conventional wisdom indicates that year-over-year declines are going to be present for the remainder of the year, given the low inventory situation in most markets. Demand is certainly present and has created competitive situations that have kept prices up. Rental prices are also up, which may lure more toward homeownership.

New Listings were up in the Charlotte region 7.3 percent to 5,027. Pending Sales increased 23.2 percent to 4,525. Inventory shrank 22.7 percent to 11,150 units.

Prices moved higher as Median Sales Price was up 10.2 percent to \$219,300. Months Supply of Homes for Sale was down 30.2 percent to 3.0 months, indicating that demand increased relative to supply.

As inventory continues to drop, the contradictions of today's market are evident. Sellers should feel confident enough to list homes at fair prices and receive meaningful offers in a healthy residential real estate and overall economic environment. However, there may be lingering worry over the availability of move-in ready homes to replace what was sold. On a brighter note, building permits are trending upward. That news should be weighed against the fact that the highest level of activity is in multifamily rentals.

As a result, the new "Pending Sales" stats trend higher and the new "Months Supply of Inventory" stats trend lower since July 2012. | Data is refreshed regularly to capture changes in market activity. Cumulative Days on Market Until Sale

Cumulative Days on Market (CDOM) functions like DOM; however, CDOM tracks the days on market for a property over multiple listings on the property. When a new listing is entered, the CDOM only resets to zero if the previous listing closed (as in sold) or if the previous listing has been off market (expired or withdrawn) for more than 90 days.
